PROFESSIONAL SUMMARY

RHCSA and CCNA-certified IT professional with hands-on lab experience in Linux system administration, security hardening (SELinux, firewalld), storage management (LVM), and enterprise networking (VLAN, OSPF, inter-VLAN routing). Skilled in shell scripting and systemd automation, with foundational exposure to DevOps tooling including Docker, Ansible, and AWS. Seeking a System Administrator role to apply certified, lab-tested expertise in building reliable, secure, and well-documented system environments.

PROFESSIONAL CERTIFICATIONS

- **CCNA**(Cisco Certified Network Associate) – (Cisco ID – CSCO15125527) | Earned: June 2026
- **RHCSA**(RedHat Certified System Administrator) – (ID – 260-089-396) | Earned: July 2026

HANDS-ON LAB

RedHat Enterprise Linux Administration Lab (RHCSA):

- Configured **SELinux** port and file contexts, restored default security contexts, and managed enforcing/permissive modes for custom service deployments.
- Resized **LVM logical volumes** live across **ext4, XFS, and vfat filesystems** without data loss.
- Deployed Apache **httpd** on non-standard ports with matching **SELinux policy and firewall rules**.
- Built and enabled **systemd service and timer units** for automated task scheduling.
- Automated **SSH key-based authentication**, known-hosts configuration, and **user/group provisioning** across a multi-node lab.

Cisco Networking Lab (CCNA):

- Designed and tested **inter-VLAN routing, OSPF, and EtherChannel** across a simulated multi-switch topology.
- Performed **IPv4/IPv6 subnetting** and configured **dual-stack addressing** for a segmented network.
- Diagnosed device topology and neighbor relationships using **CDP** and **LLDP**.
